**Subject:** ACIAR Update # 8 : Our ACIAR project is now an Associate Project of CRC for Catchment Hydrology

Hello everyone,

good news, today Prof Rob Vertessy ( Director Cooperative Research Centre for Catchment Hydrology [CRC\_CH] ) informed me that our application to be an Associate Project of the CRC\_CH was successful. This provides our ACIAR project with good links with the CRC\_CH, not only the CRC\_CH "Toolkit" but also its communication pathway. Our project will be an example of the CRC\_CH Toolkit going international (to China from Australia) and the analysis of the daily AVHRR time series of the Murray-Darling Basin from 1986 until current will be a key research component undertaken in Australia that the CRC\_CH is interested. Hopefully such time series data will be a key for the re-bid of CRC\_CH III.

I look forward to working with each of you to successfully finish our project.

see you

Tim
