A GIS Approach to Quantify Impact of Flooding on Shallow Groundwater Levels in the Wakool Irrigation District

Butian Wang, Shahbaz Khan, Natalie O’Connell
CSIRO Land and Water, Griffith Laboratory

Appendix A Part 3 of 4

Maps (1982 – 1989) Showing Spatial Distribution of Piezometers with Data and Interpolated Water Table

CSIRO Land and Water Technical Report No. 22/04
May 2004
Appendix A   Part 3 of 4

Maps (1982 – 1989) Showing Spatial Distribution of Piezometers with Data and Interpolated Water Table
Figure A65. Water table in the Wakool area in February 1982 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 712)

Figure A66. Water table in the Wakool area in April 1982 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 92)
Figure A67. Water table in the Wakool area in May 1982 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 424)

Figure A68. Water table in the Wakool area in August 1982 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 804)
Figure A69. Water table in the Wakool area in September 1982 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 98)

Figure A70. Water table in the Wakool area in November 1982 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 451)
Figure A71. Water table in the Wakool area in December 1982 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 105)

Figure A72. Water table in the Wakool area in February 1983 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 823)
Appendix A – Spatial Distribution of Piezometers with Data and Interpolated Water Table

Figure A73. Water table in the Wakool area in May 1983 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 469)

Figure A74. Water table in the Wakool area in August 1983 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 826)
Figure A75. Water table in the Wakool area in November 1983 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 123)

Figure A76. Water table in the Wakool area in February 1984 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 853)
Figure A77. Water table in the Wakool area in May 1984 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 455)

Figure A78. Water table in the Wakool area in June 1984 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 122)
Figure A79. Water table in the Wakool area in July 1984 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 869)

Figure A80. Water table in the Wakool area in February 1985 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 871)
Appendix A – Spatial Distribution of Piezometers with Data and Interpolated Water Table

Figure A81. Water table in the Wakool area in July 1985 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 860)

Figure A82. Water table in the Wakool area in February 1986 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 885)
Appendix A – Spatial Distribution of Piezometers with Data and Interpolated Water Table

Figure A83. Water table in the Wakool area in July 1986 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 878)

Figure A84. Water table in the Wakool area in February 1987 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 750)
Appendix A – Spatial Distribution of Piezometers with Data and Interpolated Water Table

Figure A85. Water table in the Wakool area in July 1987 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 997)

Figure A86. Water table in the Wakool area in February 1988 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 884)
Appendix A – Spatial Distribution of Piezometers with Data and Interpolated Water Table

Figure A87. Water table in the Wakool area in July 1988 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 1128)

Figure A88. Water table in the Wakool area in February 1989 and piezometers with data available for that time from which the water table is generated. (Total number of piezometers: 966)
